

Student Doctor Responsibilities

During the M1 and M2 years, your goal is to perfect skills associated with the intake and physical exam. This correlates with skills that you are learning in PCM. Utilize the guidance of your M3/M4 to help you develop as a student-doctor.

M1 Responsibilities

Objective: Learn about your patient and general clinic procedures

Semester 1

- Observe the patient encounters
- Learn to take vitals
- Familiarize yourself with EMR
- Read prior EMR notes
- Attend teaching sessions

Semester 2

- Take vitals at each appointment
- Learn/Practice Physical Exam
- Deliver summary to scheduler
- Participate in the composition of the EMR note
- Attend teaching sessions

M2 Responsibilities

Objective: Learn how to assess patients and manage patient care

Semester 1

- Perform Physical Exam with assistance of M3/M4
- Teach M1 to take vitals
- Start writing the EMR note
- Set up follow up appointment & deliver summary to scheduler
- Attend teaching sessions

Semester 2

- Start presenting with assistance of M3/M4
- Teach M1 Physical Exam Skills
